

COMMANDperformance

Business Intelligence and Data Warehousing

You need quick, easy access to data from all of your operational and business systems to make decisions every minute of the day. Data Warehousing accumulates data from all of your systems into a single location. Business Intelligence software gives you that quick, easy access. Let COMMANDperformance give you the answers you need.

Designed for Construction Materials Producers & Suppliers

There are off-the-shelf solutions to consider, but only COMMANDperformance is designed for Construction Materials Producers. Our Data Warehouse pulls data from your operational systems, financial applications, and time and attendance programs and correctly transform the data for the unique needs of producers. COMMANDperformance then delivers information via a suite of dashboards and analysis views also designed specifically for producers. No need to spend additional hours and dollars customizing off-the-shelf solutions for your needs.

	2013/08/01	2013/08/04	2013/08/11	2013/08/18	MTD	Prior MTD	YTD	Prior YTD

Let COMMANDperformance -

Save you money -

- Dashboards offer insight into all of your operational metrics allowing you “drill down” to the details of any situation and stay in touch and in control of all of your cost elements.
- Real-time data delivery to your desktop and mobile devices highlights exceptions and exposes trends so you can make timely, accurate decisions that keep your operational and material costs in check.
- Savings on IT costs also add to your profitability as less time and effort is spent looking for, organizing, and manipulating the data you need to make informed decisions.

Make you money -

- Budget Analysis and Sales Forecasting allow you to manage your sales pipeline, avoid missed opportunities, and bid on only the right jobs.
- Accurate customer metrics allow you to negotiate competitive pricing as well as collaborate on performance improvements with your customers.
